

BlueView Standard - Coming Soon!

The IP Lock and Security Company

BlueView is the most efficient access control system in the industry, scaling from a few doors to an enterprise class software managing thousands of doors all on one network.

BlueView software and BlueWave door controllers are IP addressable, which run native to any 21st century IT network. This intelligence allows management positive control of any door at any time!

BlueView is now conveniently preloaded on a FREE laptop* to expedite installation and commissioning the system.

BlueView Standard

The essential features and power of BlueView offered as an entry level solution

BlueView Professional

Our most popular and feature rich solution offered as the best value solution

BlueView Enterprise

A robust platform offering unlimited growth with all the features and modules currently available

INCLUDED FEATURES

Web Pages/ Web Interface

Everyday management of your BlueWave system made simple through the BlueWave web interface, now with a streamlined installation process.

Commissioning Import Utility

Directly import spreadsheets of common information for systems such as Shifts, Card Holders, and Doors.

Email Notifications
