

The 26B-Sticker allows any VIP card, visitor card, cell-phone or non-metallic device to turn into a 26 bit proximity credential to use with your BlueWave Security access control system. It has a strong adhesive back that is easily attached to the desired device for a long-lasting hold. If you have already issued a custom printed card for an employee/guest and want that card to now become their proximity credential...the 26-Sticker is the solution for you!

Features:

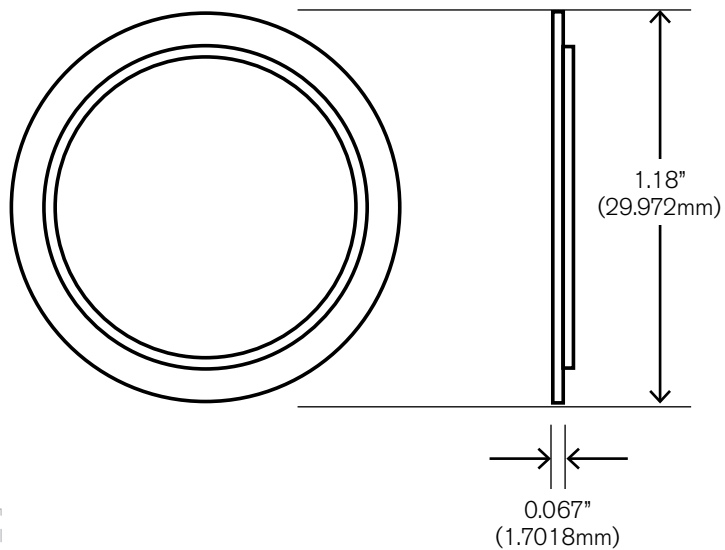

- 125Khz Technology
- Easy to Apply
- Cost Effective
- Consistent Read Ranges Comparable to a Proximity Card or Fob
- Quarter Sized

26B-Sticker
