

BlueWave Security School Machine Shop Solution

NG1-E-BO | KP26-MM | BV-STRD | Auxiliary Relay

Need a unique solution to give, limit, and track Access to Machine Shop Tools in your School?

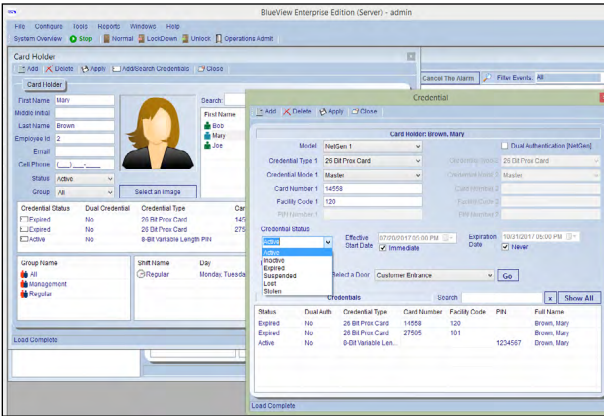

By combining the BlueWave Keypad (**KP26-MM**), controller (**NG1-E-BO**), relay (**Auxiliary Relay**), and software (**BV-STRD**) you can effectively monitor and control the access to equipment for multiple users.

Features of the System:

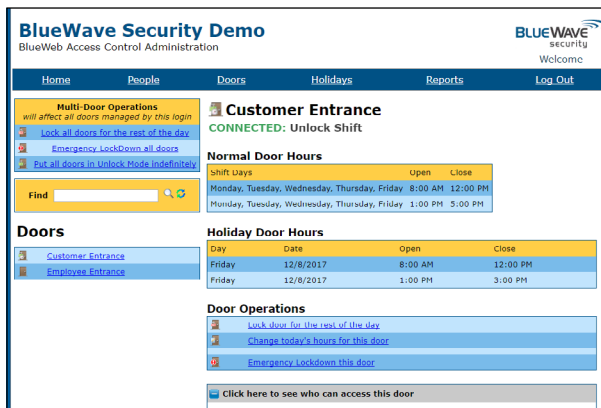

- Machines will Activate Once a Student PIN is Entered and Authenticated
- Machines will Only Be Available During Class Period for Permissioned Students
- Audit Trail Reporting for Machine Activity, Up To 2000 Audit Events
- WebPages Module for Easy Administration Management from Any Networked Computer
- Multiple Options for Teacher to Instantly Turn-Off All Machines and Lock-Out Control

Benefits of the System

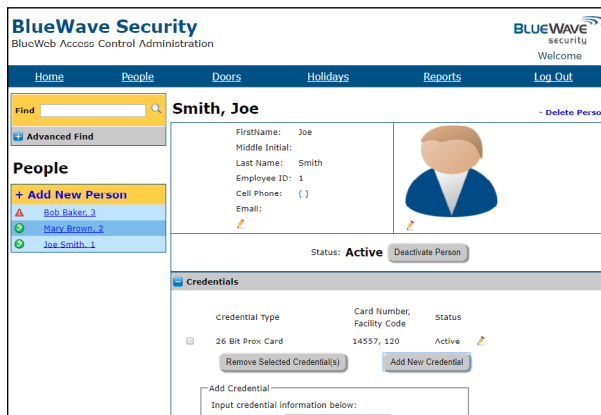

- Safety for the Students
- Students Can't Activate Machines Outside of Their Scheduled Class Period
- System Can Also Be Leveraged for School-Wide Access Control Needs
- Active Directory Can Automatically Update Software By Syncing with Student Registration Software
